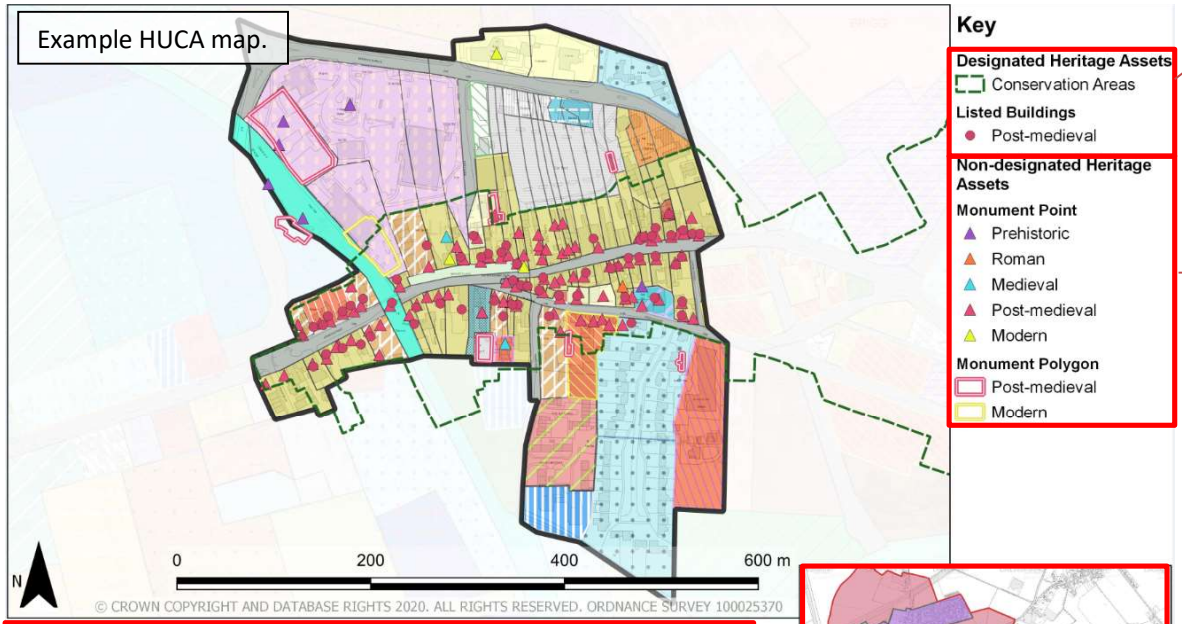
How to use the Historic Urban Character Maps

The Historic Urban Character Area (HUCA) maps show the individual Historic Urban Character Types (HUCTs) that make up the Historic Urban Character Area. For example HUCA 1 below shows the town centre of Brigg, which is made up of a mixture of commercial buildings such as shops and offices, civic buildings and residential areas. These maps also show the known archaeological monuments and buildings in the area.



The Key contains all of the data which is kept in the Historic Environment Record (HER) and on the National Heritage List for England (NHLE). All are categorised to demonstrate date.

Listed Buildings, Scheduled Ancient Monuments, Conservation Areas, Registered Parks and Gardens, – Designated Heritage Assets, a statutory list kept by the NHLE of all monuments which are of national importance. Each point has a unique identifying number (i.e. 1062683).

Monument Points, Lines and Polygons – Data held by the Historic Environment Record for Lincolnshire. Each item has a unique identifying number (i.e. MLI12345), which is used to hold as much information as is known about the monument.

Mini map - shows where the HUCA fits into the wider town.

Historic Urban Character Types, Type – refined descriptive type showing the character of the individual block in present day.
