

How to use the Historic Urban Character Maps

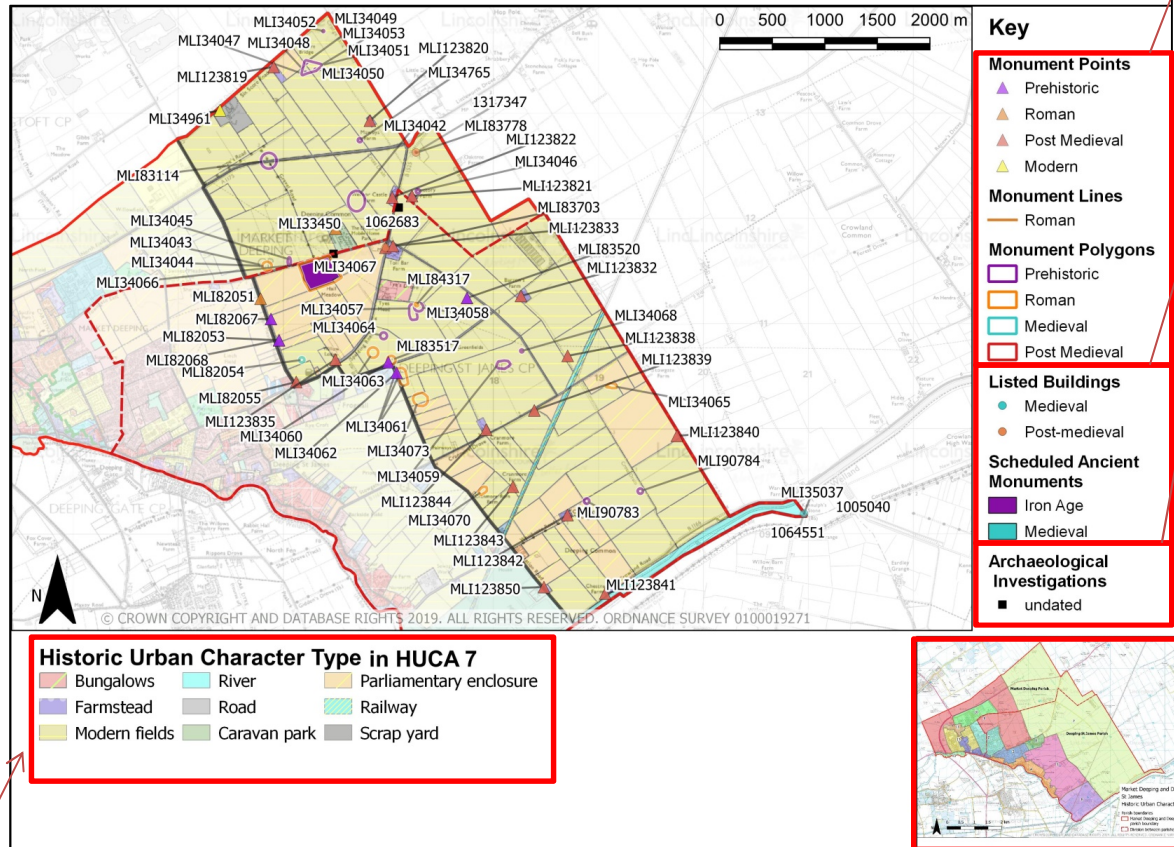

The Historic Urban Character Area (HUCA) maps show the individual Historic Urban Character Types (HUCTs) that make up the Historic Urban Character Area. For example HUCA 7 is predominantly 'Modern Fields' and Parliamentary enclosure with interspersed 'bungalows', 'farmsteads' and commercial HUCTs such as the 'scrap yard' and 'caravan park'. These maps also show the known archaeological monuments and buildings in the area.

The Key contains all of the data which is kept in the Historic Environment Record (HER) and on the National Heritage List for England (NHLE). All are categorised to demonstrate date.

Monument Points, Lines and Polygons – Data held by the Historic Environment Record for Lincolnshire. Each item has a unique identifying number (i.e. MLI12345), which is used to hold as much information as is known about the monument.

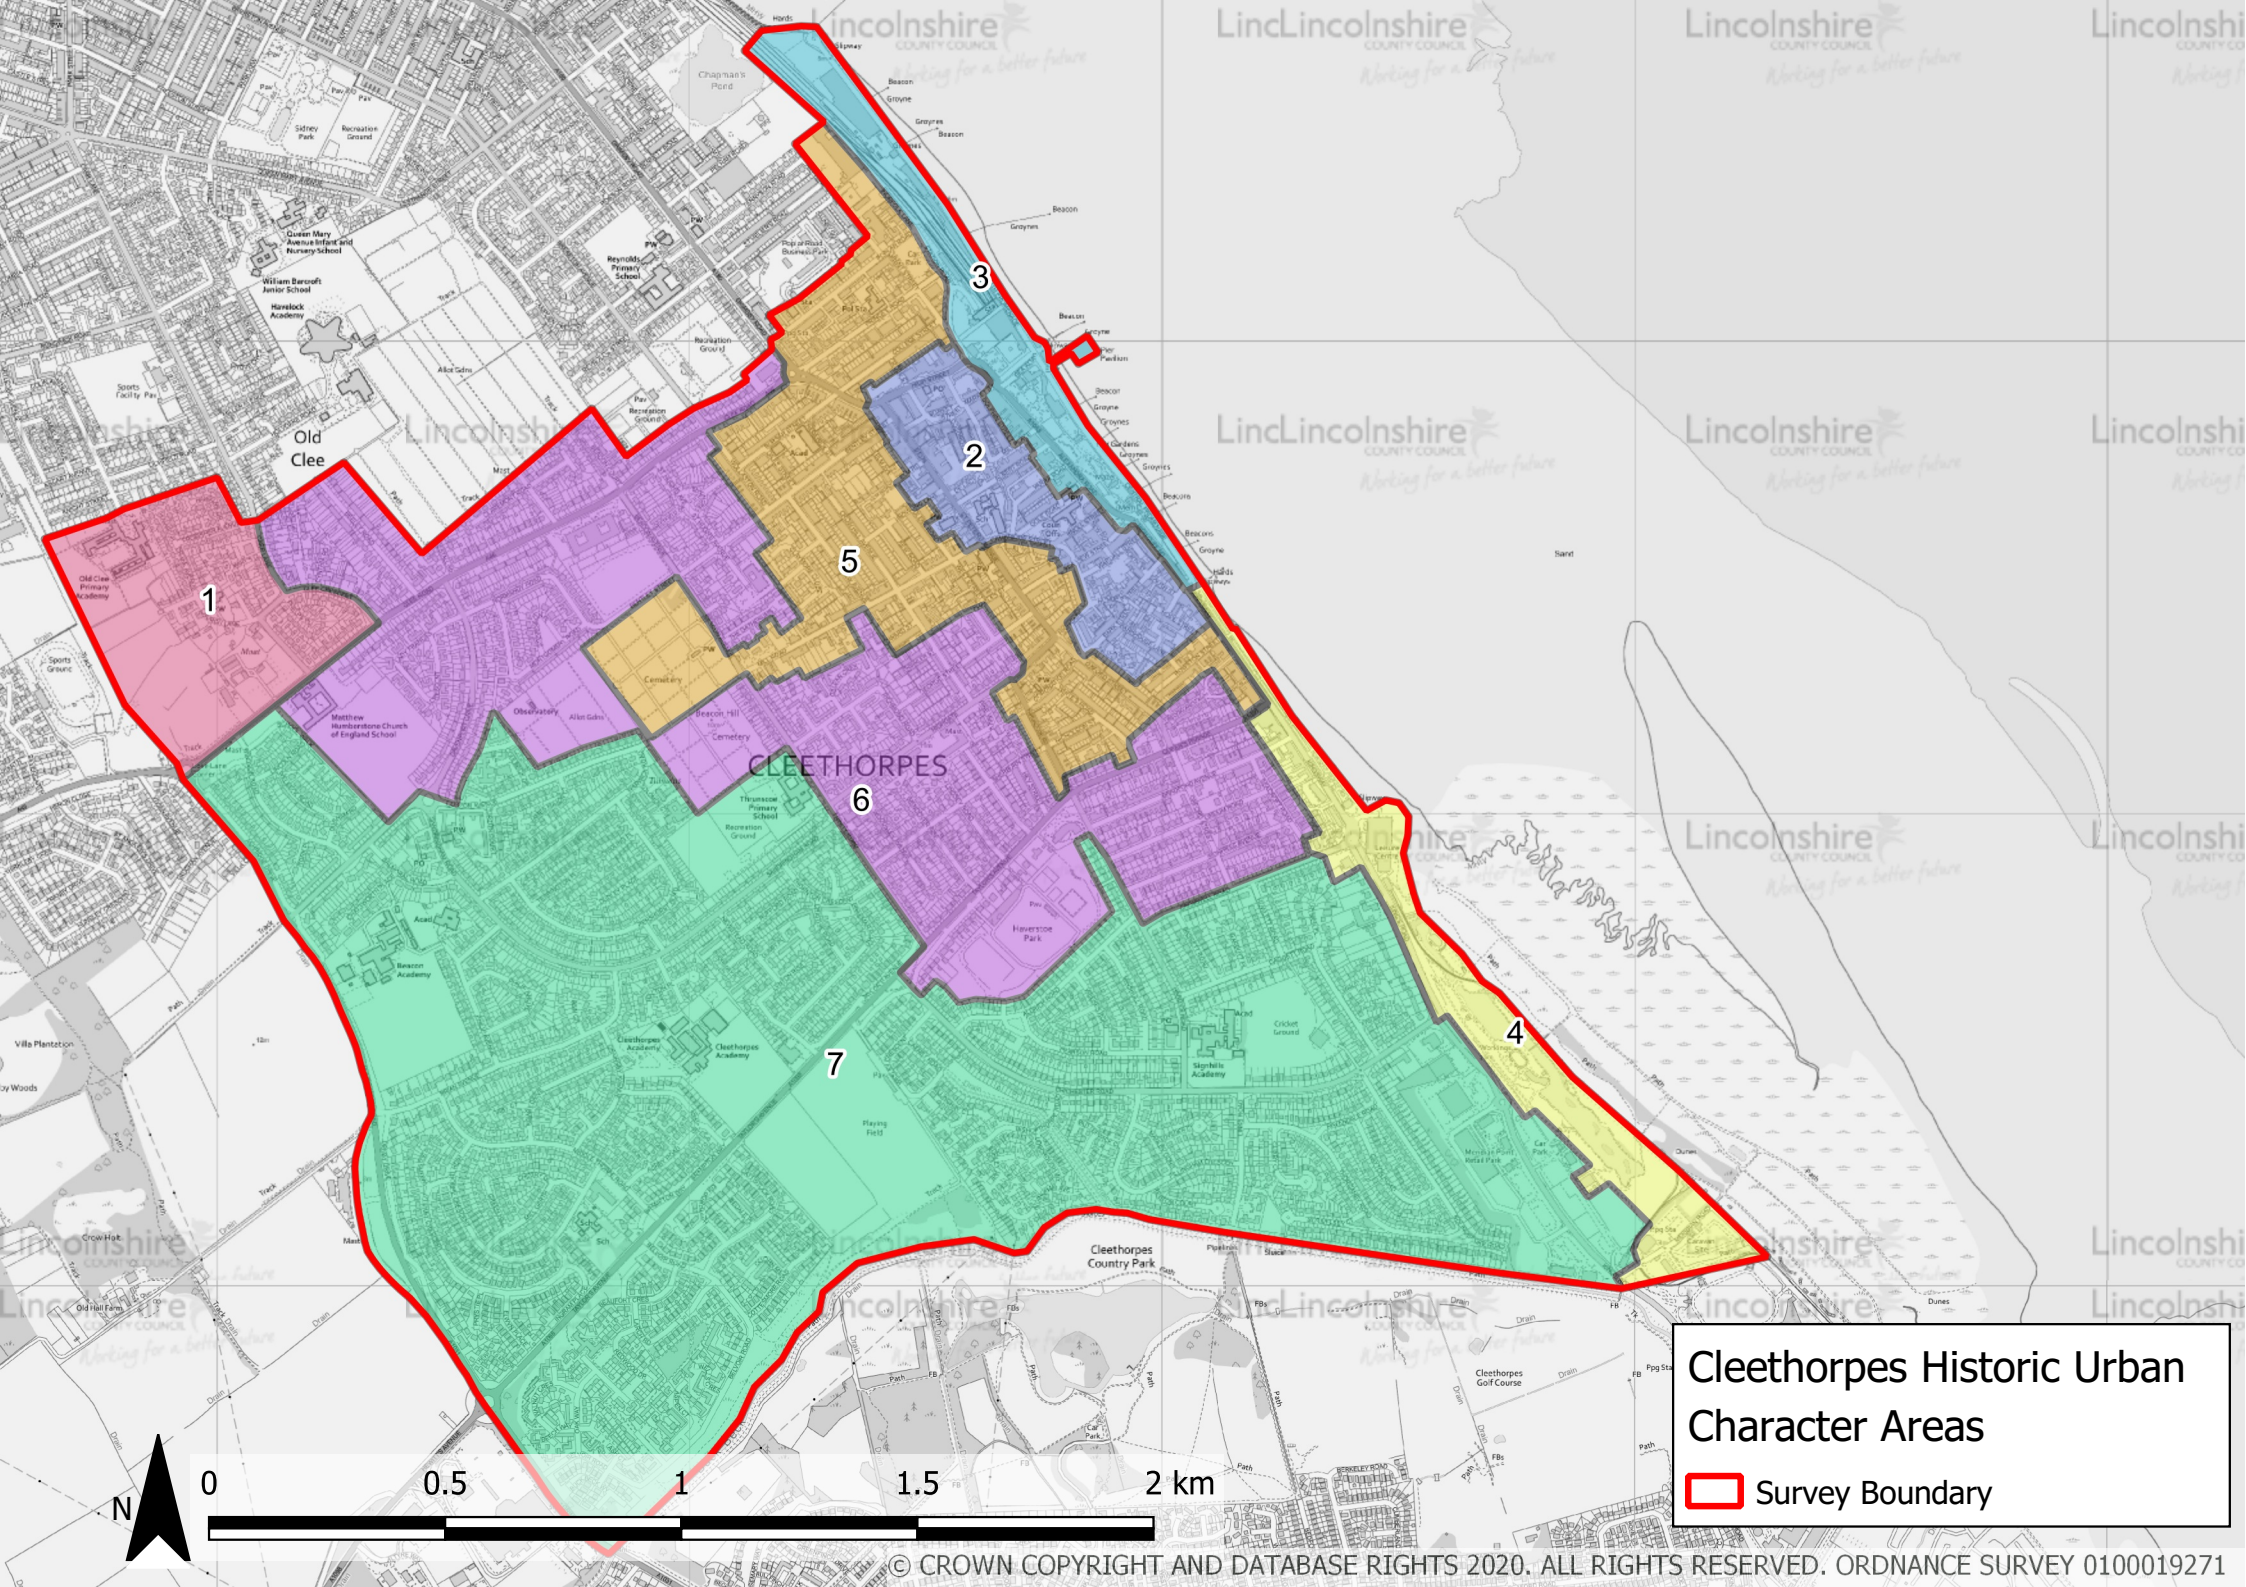

Listed Buildings, Scheduled Ancient Monuments, Conservation Areas, Registered Parks and Gardens, – Designated Heritage Assets, a statutory list kept by the NHLE of all monuments which are of national importance. Each point has a unique identifying number (i.e. 1062683).

Archaeological Investigations – Reports from archaeological investigations which are held in the HER.

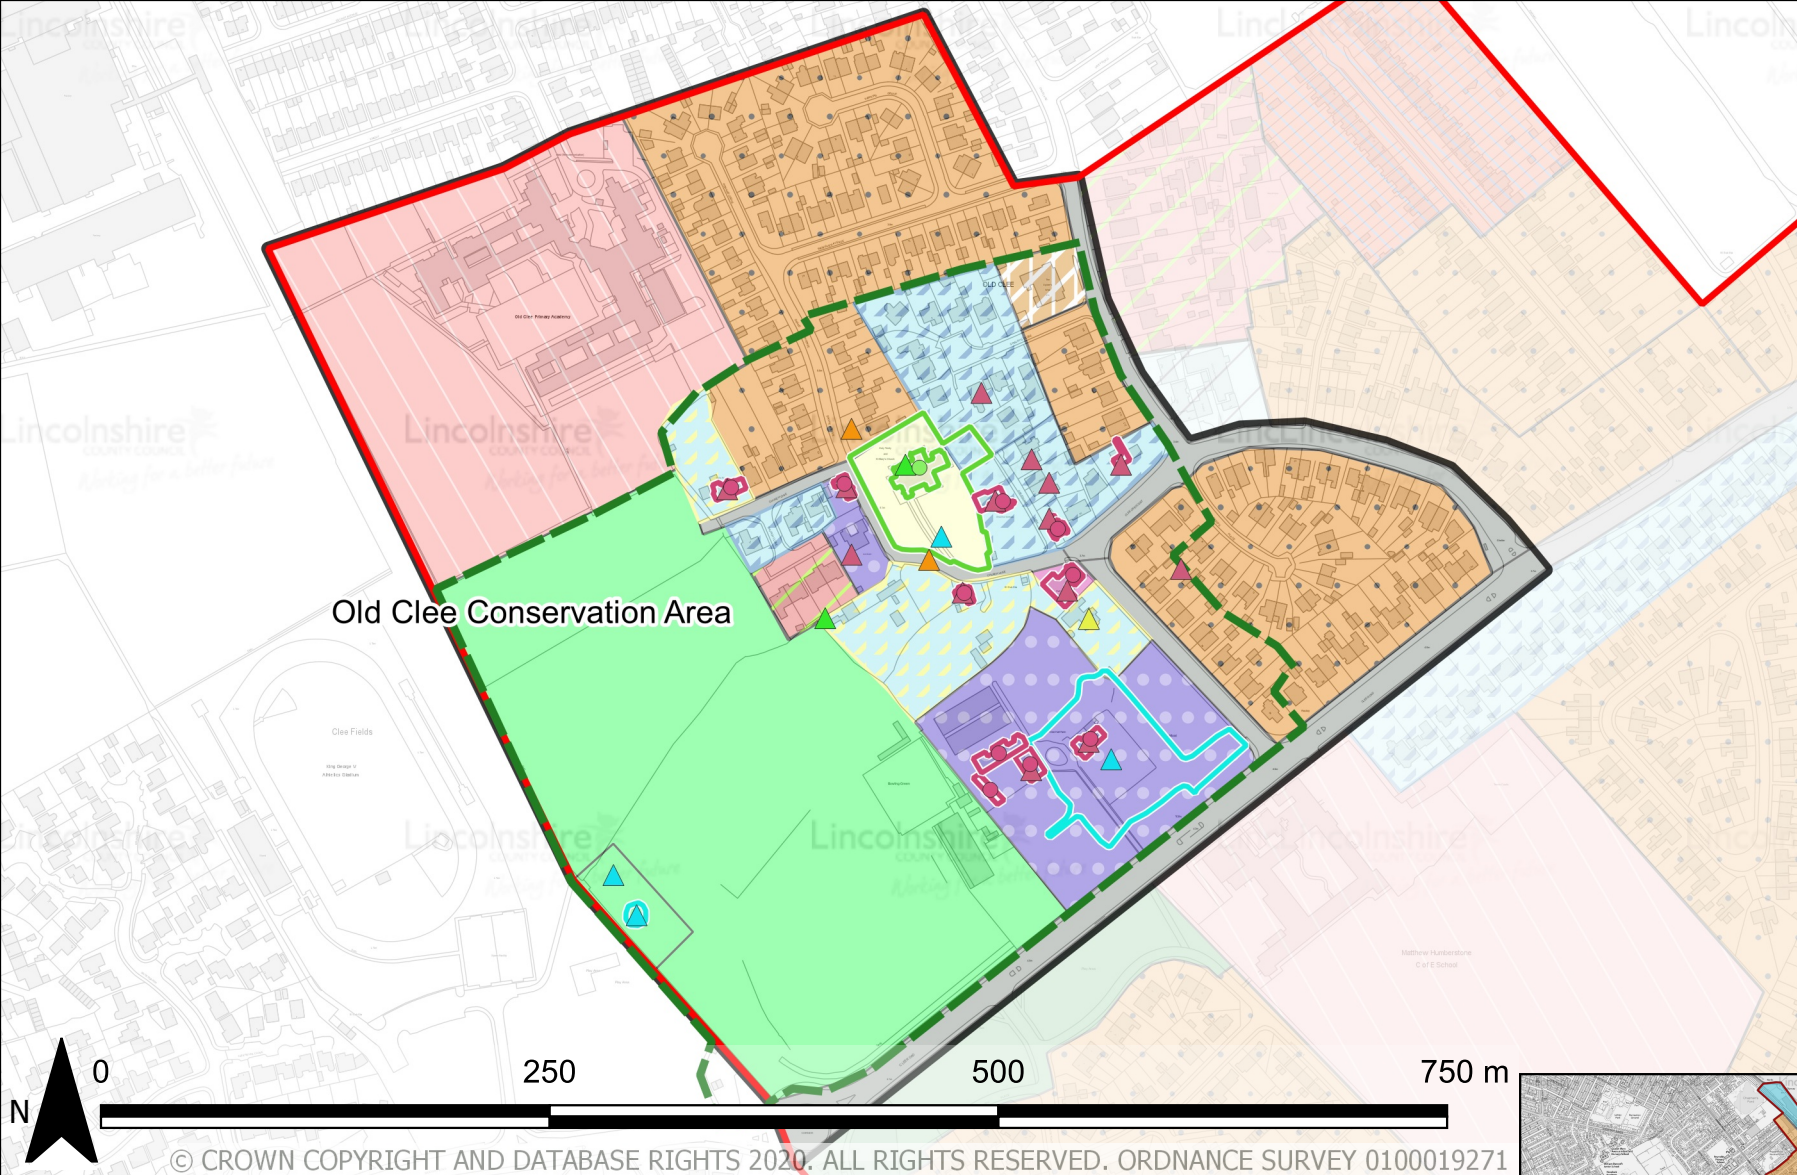

Historic Urban Character Types, Type – refined descriptive type showing the character of the individual block in present day.

Mini map - shows where the HUCA fits into the wider town.
